Office Action Summary	Application No. 10/559,621	Applicant(s) SLUNICK ET AL.	
	Examiner Fannie C. Kee	Art Unit 3679	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- a. Species I – drawn to Figures 1-2;
- b. Species II – drawn to Figure 3;
- c. Species III – drawn to Figure 4; and,
- d. Species IV – drawn to Figure 5.

2. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 3679

3. The claims are deemed to correspond to the species listed above in the following manner:

- i. Claims 1-9 and 13-18 correspond to Species I because they disclose a fluid connection assembly where the fluid port is inserted into the metal tube and which has both a retainer and a locating feature.
- ii. Claims 1-5, 8-10, 15, and 18 correspond to Species II because they disclose a fluid connection assembly where the metal tube is inserted into the fluid port and which has both a retainer and a locating feature.
- iii. Claims 2-5, 8, 11, and 19 correspond to Species III because they disclose a fluid connection assembly where the fluid port is inserted into the metal tube and the metal tube is crimped to retain the fluid port within the metal tube.
- iv. Claims 2-5, 12, 15 and 18 correspond to Species IV because they disclose a fluid connection assembly where the metal tube is inserted into the fluid port with a seal to seal the joint between the metal tube and the fluid port and which has a retainer which encloses the entire joint.

The following claim(s) are generic: 2-5.

4. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the species disclosed are not similar as they show varying means used to create fluid connections assemblies, i.e., the different connections between the housing and the tube and the use of a retainer or lack there of.

Art Unit: 3679

5. A telephone call was made to Karin H. Butchko on 5/17/07 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
